Fall is officially here. The days are shorter, the nights are cooler and the Browns are O-3. It's also Oktoberfest somewhere and clam bakes are everywhere. There is still time to get in some golf, boating and biking but I think it's time to start thinking about winter sports. I hope everyone is getting in shape for the upcoming ski season. To help with your training we are going to have someone from the fitness center speak about conditioning for skiers at the October meeting (Oct. 3rd) so bring your notepads. Also remember to get your membership dues in early so you don't get charged a late fee.

The board has been busy planning for the upcoming ski season and things appear to be in good shape. The Park City trip is over half full and the Lake Tahoe trip is about half full. Get signed up now so you don't get left out. We also have trip leaders for all of the trips except the Seven Springs trip (Feb 2nd). If you think you would enjoy the sense of accomplishment that goes with running a trip then contact Mike Kaltenstein and we'll help you get started today.

We have a lot of interesting things coming up so check your NASA Ski Club newsletter or the web event calendar so you don't miss anything. Geiger's Ski Shop is having an appreciation night for the NASA ski club on Friday Oct. 20th. They will be showcasing the latest equipment and will also have munchies and specials on ski tuning. Geiger's is also having a women's clinic Oct. 5-7th with Jeannie Thoren to aid in fitting skis and boots so if you are a woman and you need new stuff check it out. Also coming up is the Kissing Bridge Appreciation Night downtown at the Hyatt (Oct. 27th) and the Boston Mills Open House (Oct. 13-15). We still need volunteers to work the NASA Ski Club table so if you'd like to get involved talk to Mike Kaltenstein or Annie Easley. Our next club meeting is October 3rd at BW3 so come out and have a beer and some wings.

## **ASTRONOMY LECTURE**

### **FREE EVENT at the Cleveland Museum of Natural History**

Date & Time: October 19, 2006, 8:00 PM

Lecture: Mapping the Milky Way with SDSS and LSST

Lecturer: Dr. Zeljko Ivezic, University of Washington

Come to an astronomy lecture at the CMNH and learn how "they" map the Milky Way and other galaxies with major geek toys like the LSST(Large Synoptic Survey Telescope). The admission to the Museum is free and the parking is free. If we want to sit together let's meet at the admissions desk around 7:40 PM.

Abstract: The formation of such galaxies as the Milky Way was long thought to be a steady process that created a smooth distribution of stars. Instead, recent discoveries of complex sub-structure in the distribution of the Milky Way's stars have deeply shaken this standard view. Zeljko Ivezic discusses how the exceptionally accurate and robust data from such modern surveys as the Sloan Digital Sky Survey (SDSS) have made some of these discoveries possible. He also speculates on what further progress can be expected from upcoming next-generation surveys, such as the Large Synoptic Survey Telescope.

By the way, the museum has 5 free astronomy lectures like this each year.

## Biking Report by Barb Cool

The lucky 7 partook on the bike ride on the Ohio and Erie Towpath Trail on Saturday, Sept. 16th. Kerry (a co-worker of mine) and I caught up after a late start to the other 5 riders including Cheryl, Paul, Fred, Kathleen and Debbie at Winking Lizard in Peninsula for food and drink outside until the bees chased us inside! We then were able to catch a few minutes of the ohio state game. We not only had a great workout since we rode about 13 miles each way; but had a good fitness workout for skiing. Bicycling strengthens the quads and provides a good aerobic activity.

Some additional highlights besides the georgeous weather were that Fred Merchant rode a good ways with no hands and Kathleen Cooper's friend said she will join Nasa Lewis Ski Club!

A note on skiing fitness: Skiing fitness should begin a minimum of 8 weeks prior to your time on the slopes. Key are **muscular strength** and **endurance** especially in the leg muscles. **Flexibility** (having a good range of movement in your joints) will enable your body to adjust to any sudden changes in direction and also will help to **prevent injury** when falling. **Aerobic** training enables you to ski longer (fatigue can result in poor concentration which can then result in crashes).

## Jeannie Thoren

Mark your calendars ladies!!! Jeannie Thoren will be at Geiger's the following dates:

**October 5th**, Thursday evening and **October 6th**, Friday, at their Chagrin Falls location ( 50 shopping plaza) 440-247-4900.

**October 6th**, Friday evening and **October 7th**, Saturday at their Lakewood Location (14720 Detroit Ave) 216-521-1771.

The format is..... in the evening (includes raffles!) 6:00 pm wine and cheese party, at 7:00 Jeannie gives her presentation. Afterwards appointments are made for the following day.

Jeannie Thoren is a ski pioneer in getting equipment right for women. She has been doing this for over 30 years and all over the world in her crusade. Besides ski shop events, she holds multi-day workshops on the snow and on-snow demos.

From the Jeannie Thoren brochure-----**Boots:** Your feet should never be cold or in pain. **Footbeds:** you need custom tweaking to achieve optimal fit. **Bindings:** Most skis on the market today have a forward binding mark to place the smaller foot closer to the tip as a result of Jeannie. **Skis:** skis turn from the tip, you need to get your weight forward on the ski to carve; otherwise you are not carving and you are not in control (skiing in the back seat!)
