

BIG NEWS AT BIG SKY

Kircliff - THE EDGE OF POSSIBILITY

Starting this winter season, take the new Explorer Gondola to the Lone Peak Tram and then step inside Kircliff, a stunning two-story glass observation deck perched at 11,166 feet. The glass floor enhances the view of terrain shaped over millions of years.

For the first time ever, any guest, any age—on foot or on skis—can gaze down the fall line of Lone Mountain with views of three states (Montana, Idaho, and Wyoming), two National Parks (Yellowstone and Grand Teton), and millions of acres of wilderness.

Savor a rare moment of stillness, perspective, and awe that will stay with you long after you've descended. Kircliff redefines what it means to experience Montana's high country.

Thirty-three of us will go BIG, March 21-28. Email me at BigSky2026@LewisSkiClub.org to be added to our waiting list.

Next month I'll bring you the latest on the new Explorer Gondola which will make its first turns later this year.
